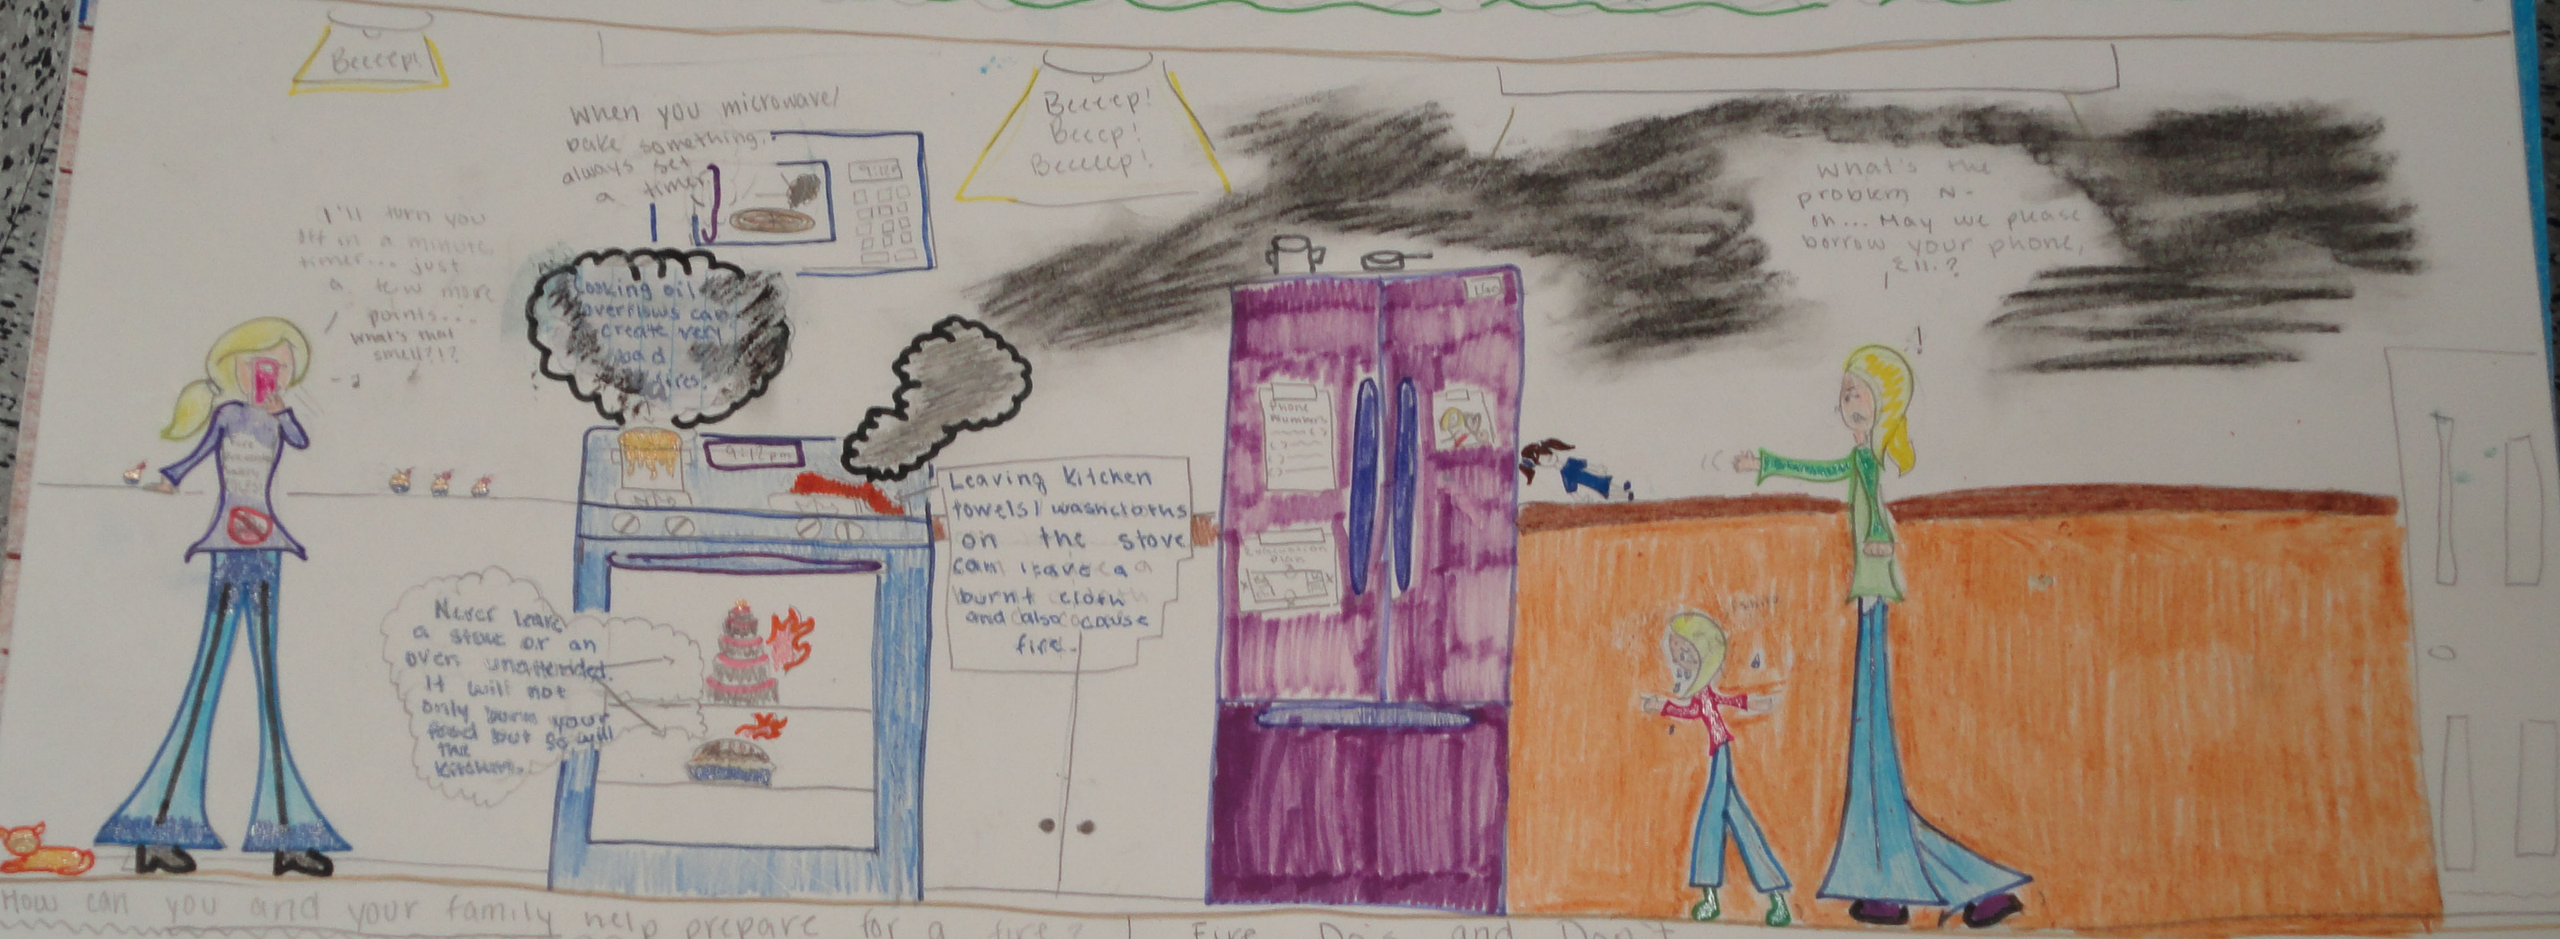
Preventing Fire is not a Joke, so don't send your House up into Smoke!



How can you and your family help prepare for a fire?

Make sure that you have an evacuation plan. Have an extra plan in case a fire is near the exil.

Have fire drills about once a month, using both plans.

Have fire alarms set up and replace the batteries once a month. Test them when you replace the batteries.

Fire Do's and Don't

- Do stay together
- Don't split up.
- Don't stop and collect valuables. Safety is more important!
- Do help family out of the house. Crawl so you don't breathe in smoke.
- If you are cooking, quickly turn the burners off and evacuate.

MAKE SURE YOUR KITCHEN

IS SAFE WITH S.A.F.D
