

eVision

Child Care Attendance Tracking Online Billing

What is the Child Care Attendance Tracking Application?

The application is a web-based program that allows child care providers who have signed a Regulated Provider Rate Schedule or a TRS-TEEM or Texas School Ready agreement to track and submit attendance and contact logs online, and eliminate the submission of paper billing forms and contact logs. Child care providers will be able to submit bills on a monthly or bimonthly basis, just like the current paper-based system.

Do I need to have a computer at my day care center to use the system?

Not necessarily. The system is completely web-enabled just like a Hotmail or Yahoo e-mail account. You can get into the system from any computer in the world that is connected to the internet. This means that a provider that doesn't have a computer at the facility can record their attendance and contact log on paper, then enter the data on a computer at home or another location and submit it to the child care contractor.

Microsoft Word 97 or higher is required in order to use the eVision system.

What are the benefits?

- You can use the system from **any** computer (*even away from the office!*)
- Save money (*No postage or gas used in dropping off Form 2455*)
- Takes only 15 minutes
- Decreases paper usage (*system meets federal records requirement*)
- Provides added communication with CCDS Accounting staff (*both providers and contractor can record entries*)
- More accurate submissions (*means less time on corrections*)
- Technical Support
- Priority Processing!
