Re: Grissom Road Business Park

**MDP # 006-07**

Dear Mr. Thornber,

The City Staff Development Review Committee has reviewed Grissom Road Business Park Master Development Plan **M.D.P. # 006-07**. Please find enclosed a signed copy for your files. Your plan was approved for acceptance; however please note the following conditions:

In consideration of public safety and convenience, excessive grades by reason of topography should be avoided in street layouts and arrangements. Any access and R.O.W. issues along state facilities will need to be resolved with the **Texas Department of Transportation (TXDOT)**. For information about these requirements you can contact TXDOT at 615-5814.

**DSD – Traffic Impact Analysis & Streets** indicate that under the UDC listed below are some of the requirements and onsite improvements that are necessary and shall be provided by the developer, on and before the completion of Grissom Road Business Park MDP, at no cost to the City of San Antonio:

- All access driveways shall comply with UDC 35-506(r)
- All roadways shall conform to Table 506-2 Functional Classification System Description for Traditional Design Classification.
- All sidewalks shall comply with UDC 35-506 (q).
- All access roadways shall provide clear sight distance on all existing and proposed roadways in order to provide adequate obstruction free viewing distances for approaching traffic. All signage, landscaping, and improvements shall be selected and located so as to not block these clear sight distances areas.

It should be understood that this is a general review of a conceptual plan not an in-depth review of internal and external traffic flow, nor streets and drainage plans. All technical requirements of the Unified Development Code (35-506) will be complied with at the time of platting.

**Tree Preservation** approves with the following conditions:

- 2003 Tree Preservation ordinance standards per UDC Section 35-523 – a Tree Preservation Plan has been approved under for this project – AP 1148085.
- Landscape ordinance per UDC Section 35-511. Some landscape points might be met by preserving existing vegetation (either through preservation of smaller material or transplanting). Recommend securing knowledgeable Landscape Architect at planning and design phase to better utilize existing trees and vegetation. Preservation will eliminate the need for irrigation. Staff would be willing to meet with developer at design stage to assist with tree preservation and landscape plan.

If you have any further questions, please call Joan Miller at (210) 207-8265.

**Environmental Services Department** states:

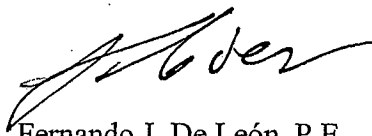

- A soil assessment shall be submitted to the Texas Commission on Environmental Quality before any permits for development of the site in accordance with rule §330.953 of the Texas Administrative Code to determine if the site is a former landfill.

All platting shall comply with the Unified Development Code, Master Plan, and Major Thoroughfare Plan for the city of San Antonio.

Please note that this action by the committee does not establish any commitment for the provision of utilities, services or zoning of any type now or in the future by the City of San Antonio. If the proposed development is not platted in phases this Master Development Plan (MDP) will be invalid.

If you should need further assistance, please feel free to contact Larry Odis at 210-207-0210.

Sincerely,

Fernando J. De León, P.E.  
Interim Assistant Director Development Services Department  
Land Development Division
