Re: Gordon's Grove

**MDP # 007-06**

Dear Mr. Balbaugh,

The City Staff Development Review Committee has reviewed Gordon's Grove Master Development Plan M.D.P. # 007-06. Please find enclosed a signed copy for your files. Your plan was accepted however please note the following:

- In consideration of public safety and convenience, excessive grades by reason of topography should be avoided in street layouts and arrangements.
- Any access and R.O.W. issues along state facilities will need to be resolved with the **Texas Department of Transportation (TXDOT)**. For information about these requirements you can contact TXDOT at 615-5814.
- **Historic** indicates that
  - The Texas Site Atlas indicates that no archaeological sites have been previously identified within the above referenced property. However, the project area is within the Medio Creek drainage area, an area known to contain sites and there is a **high probability** that the property may contain sites, some of which may be significant. Thus, before any work that might affect any sites is begun, we recommend that a qualified professional conduct an archaeological investigation of the property.
- **DSD – Traffic Impact Analysis & Streets** indicates that the developer shall be required to provide a left turn lane from northbound Talley Road to serve left turn movements into the subdivision based on the TIA turning movements. Storage length of 200 feet with 100 foot taper.
- **Trees** approves with the following conditions:
  - 2003 Tree Preservation ordinance standards per UDC 35-523 – a Master Tree Permit has been issued for this project based on the Tree Canopy method. No additional

PLANNING DEPARTMENT  
TEL: (210) 207-7873

• P.O. BOX 839966 •  
TTY: (210) 207-7911

SAN ANTONIO, TEXAS 78283-3966  
FAX: (210) 207-7897

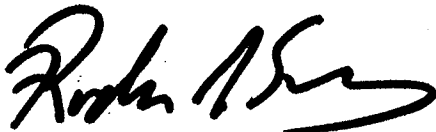

affidavit/permit fees will be required for platting or building permits on this project, but plats will be subject to a \$75 review fee.

- Streetscape Standards per UDC 35-512 – Talley Road requires streetscape on existing ROW (it appears that preservations of existing trees may fulfill this requirement if they are on the ROW thus avoiding the planting and irrigation of new streetscape trees). The new ROW on the unmanned section of collector into the subdivision will require streetscaping as well
- Please keep copy of approval and stamped preservation plan on site during site work. A copy of the stamped plan is available at the second floor reception of Development Services
- It will be expected that you will plat all of the property depicted in your Master Development Plan (M.D.P.) to include floodplains, drainage areas and open space.
- I would encourage you to work closely with the school district, so that they can plan accordingly.

Please note that this action by the committee does not establish any commitment for the provision of utilities, services or zoning of any type now or in the future by the City of San Antonio. If the proposed development is not platted in phases this Master Development Plan M.D.P. (formerly POADP) will be invalid.

**All Platting will have to comply with the Unified Development Code, Master Plan, and Major Thoroughfare Plan for the City of San Antonio.**

Sincerely,

**Roderick J. Sanchez, AICP**  
**Assistant Development Services Director**
