

City of San Antonio

## NOTICE OF OPPORTUNITY FOR PUBLIC HEARING

Stinson Municipal Airport  
San Antonio, Texas

The City of San Antonio in partnership with the Texas Department of Transportation (TxDOT) is offering the opportunity to request a public hearing covering the social, economic, and environmental effects of a proposed action that will create approximately 500 feet of low impact hike and bike trail connecting the Historic Stinson Municipal Airport to the San Antonio River Trail. The trail will be used by pedestrians and bicyclists, citizens and visitors to travel from the airport to the river via a safe and clearly marked trail.

The proposed action encroaches on the San Antonio River floodplain requiring a floodplain analysis to be performed and reviewed by the Floodplain Administrator. Notice is provided that the analysis is being conducted and the proposed action is expected to result in no effects on the base floodplain in accordance with requirements of Executive Order 11988: Floodplain Management and U.S. DOT Order 5650.2: Floodplain Management and Protection. The details of this encroachment analysis and the pertinent regulatory coordination will be incorporated in the Categorical Exclusion (CE). The City of San Antonio Aviation Department is requesting a NEPA Categorical Exclusion per FAA order 1050.1F 5-6.4a for this project.

Any interested citizen may request a public hearing covering the social, economic, and environmental effects of the proposed project. A Public Hearing will only be held upon request. If such a request is received, a public hearing will be scheduled and adequate notice will be published to announce the date and location. Requests for a Public Hearing must be in writing and received by April 28, 2018. All requests for a Public Hearing should be sent to the following address and clearly marked "Request for Public Hearing":

Mr. Steven Southers  
City of San Antonio  
Aviation Department  
457 Sandau Road  
San Antonio, TX 78216

/s/ Leticia M. Vacek, TRMC/CMC/MMC  
City Clerk
