

CITY OF SAN ANTONIO
OFFICE OF THE CITY CLERK
MUNICIPAL ARCHIVES & RECORDS

CREATOR:

City of San Antonio: Office of the City Engineer

TITLE:

Subdivision, Civil Engineer, Survey Book 7

DATES:

1883-1890

QUANTITY:

1 bound volume out of 4 total bound volumes

LANGUAGES:

English

REPOSITORY:

[City of San Antonio, Office of the City Clerk, Municipal Archives & Records](#)

ADMINISTRATIVE HISTORY:

The primary purpose of Survey Book 7 is to provide unique, identifying descriptions of property showing proposed redevelopment and restructure in San Antonio, Texas. The descriptions are property surveys created by professional survey engineers. These survey engineers were employed by the Office of the City Engineer, which was responsible for duties such as building sidewalks and making all necessary maps for the City of San Antonio. (See [Ordinance 01-88](#) of February 21, 1859; a [Resolution from November 2, 1865](#); and [Article 8 of the City Charter of 1870](#) for a detailed description of duties.) Today, the Office of the City Engineer is no longer in existence. In 1951, the City approved a new Charter and reorganized city departments, in which the Public Works Department absorbed many of the duties formerly performed by the Office of the City Engineer ([Article V, Section 61](#)).

SCOPE AND CONTENT:

This finding aid provides a page-by-page description of Survey Book 7, with links to digital images of each page. Survey Book 7 is one printed and bound volume of material held within the overarching City Engineer Collection. Survey Book 7 contains 210 pages of handwritten property descriptions and sketches made by professional survey engineers pertaining to proposed redevelopment projects in the City of San Antonio between 1883 and 1890. These surveys also feature railroads with the railroad company names, R.R. The surveys were made by multiple surveyors employed by the City, most notably C.P. Matlack, who served as City Engineer from 1883-1887; and Edwin P. Arneson, a regional engineer who served the City in providing and publishing survey drawings for the Office of the City Engineer. These surveys were made in order to assess the boundaries of properties and determine the redevelopment of private and city owned property. The properties surveyed include those of notable San Antonio individuals and families, including Adams and Wickes, and Edward G. Trueheart.
