• Open House
• Welcome and Introductions
• Presentation of Land Use Categories
• Questions and Comments
What is Land Use Planning?
Why is it Important?
SA Tomorrow Comprehensive Planning

- City’s adopted long-range policy plan
- Updated Comprehensive Planning Program (CPP) of 30 Sub-Area Plans:
  - **13 Regional Centers** – large employment and economic activity hubs
  - **17 Community Areas** – encompass all of the City not located within a Regional Center; identified based on community and neighborhood association input
- 3-phase work plan for the 13 Regional Centers
- 5-phase work plan for the 17 Community Area Plans
What is a Future Land Use Plan?

- Land Use [map + text] description and policy direction
- Utilizes **consistent and clearly defined land use categories**
- Communicates **orderly, desired future development patterns**
- A regulatory guide and decision-making tool for zoning and development used by:
  - City Staff
  - Planning Commission
  - Zoning Commission
  - City Council
- Facilitates **complementary transitions** to reduce conflicts between adjacent uses
- Determines **which zoning districts are appropriate** for future development in an area
Land Use vs. Zoning

<table>
<thead>
<tr>
<th>Land Use (Categories)</th>
<th>Zoning (Districts)</th>
</tr>
</thead>
<tbody>
<tr>
<td>A land use plan is a set of broad <strong>policies and principles</strong> to guide the City’s decision-making regarding growth and development patterns.</td>
<td>Zoning consists of specific <strong>regulations</strong> about how property owners may use and develop their land, consistent with the Future Land Use Plan.</td>
</tr>
<tr>
<td>It is a policy document that guides the physical development of a community.</td>
<td>The zoning ordinance is a law with penalties and consequences for not following it.</td>
</tr>
<tr>
<td>The focus of the land use plan is to articulate the City’s vision for future growth patterns and community form.</td>
<td>The focus of the zoning code is compatibility of neighboring uses and transitions.</td>
</tr>
</tbody>
</table>

Adoption of land use **categories** does not change zoning of property
What are we discussing today?

• Land Use categories only
  the ingredients of land use

• Applying the categories (creating a Land Use Plan) is a separate public process during each Sub-Area Plan.

• 2 basic components:
  1. Land Use Map
  2. Text description and policy direction
What are we discussing today?

• Land Use categories only
  *the ingredients of land use*

• **Applying** the categories (creating a Land Use Plan) is a separate public process during each Sub-Area Plan.

• 2 basic components:
  1. Land Use Map
  2. Text description and policy direction
Why are the Land Use Categories being revised?
Reasons to Revise Land Use Categories

1. Create a consistent, predictable group of land use categories to be used in all areas of the City over the next five years and beyond.

2. Address known challenges of existing classification(s).

3. Create, eliminate, or revise categories to allow successful implementation of San Antonio’s Comprehensive Plan and the 30 Sub-Area plans.
San Antonio’s Previously Adopted Plans

Alamodome Neighborhood Plan (1993)
Arena District/ Eastside Community Plan (2003)
Camelot 1 Neighborhood Plan (2004, 2010)
City South Community Plan (2003)
Dignowity Hill Neighborhood Plan/ Eastside Reinvestment Plan (2009)
Downtown Neighborhood Plan (1999)
Downtown West Neighborhood Plan (2009)
Eastern Triangle Community Plan (2009)
Five Points Neighborhood Plan (2000, 2009)
Greater Dellview Area Community Plan (2005)
Guadalupe/ Westside Community Plan (2007)

</table>
Proposed Land Use Categories
Process

- Started with adopted UDC Land Use categories
- Series of Focus Group meetings (Nov. 2017)
  - Community groups and non-profits
  - Neighborhood coalitions
  - External governmental stakeholders
  - Development industry representatives
  - Affected City departments
- Citywide Land Use Meeting (1/30/2018)
- Met with the City Council Offices
- Future land use webpage launched
Process...

- Planning Commission Briefing – January 24, 2018
- Planning Commission Technical Advisory Committee (PCTAC) Briefing – March 2, 2018
- PCTAC Consideration – May 11, 2018 (Recommendation for Approval)
- Zoning Commission Briefing – May 15, 2018
- Planning Commission Consideration – May 23, 2018 (Recommendation for Approval)
- Zoning Commission Consideration – June 5, 2018 (Recommendation for Approval)
- Community meetings
  - July 26, 2018
  - July 28, 2018
  - July 31, 2018
  - August 2, 2018
- Comprehensive Planning Committee Briefing – August 15, 2018
- City Council Consideration - TBD

## Categories to be Replaced
- Very high density residential
- Office
- Mixed use
- Business/office park
- Public/institutional

## Proposed New Categories
- Urban Low Density Residential
- Neighborhood Mixed-Use
- Urban Mixed-Use
- Regional Mixed-Use
- Employment/Flex Mixed-Use
- Business/Innovation Mixed-Use
- City/State/Federal Government
Residential Land Uses

**Residential Estate** – includes large lot single-family detached houses on individual estate-sized lots or in conservation subdivisions. This form of development should be located away from major arterials, and can include certain nonresidential uses such as schools, places of worship, and parks that are centrally located for convenient neighborhood access. Permitted zoning districts: FR, R-20, RE, and RP.

Typical densities in this land use category would be up to 2 dwelling units per acre.
Residential Land Uses

Low Density Residential – includes single-family detached houses on individual lots, including manufactured and modular homes. This form of development should not typically be located adjacent to major arterials. This land use category can include certain nonresidential uses such as schools, places of worship, and parks that are centrally located for convenient neighborhood access. Permitted zoning districts: R-4, R-5, R-6, NP-8, NP-10, and NP-15. Typical densities in this land use category would range from 3 to 12 dwelling units per acre.

IDZ and PUD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.
Residential Land Uses

Urban Low Density Residential – includes a range of housing types including single-family attached and detached houses on individual lots, small lot residences, duplexes, triplexes, fourplexes, cottage homes, manufactured homes, low-rise garden-style apartments, and manufactured home parks. This land use category may also accommodate small scale retail and service uses that are intended to support the adjacent residential uses. Other nonresidential uses, including, but not limited to, schools, places of worship, and parks are appropriate within these areas and should be centrally located to provide easy accessibility. Permitted zoning districts: R-3, R-4, R-5, R-6, RM-4, RM-5, RM-6, MF-18, MH, MHC, MHP, and NC.

Typical densities in this land use category would range from 7 to 18 dwelling units per acre.

IDZ, PUD, MXD, and TOD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.
Residential Land Uses

Medium Density Residential – accommodates a range of housing types including single-family attached and detached houses on individual lots, manufactured and modular homes, duplexes, triplexes, fourplexes, and low-rise, garden-style apartments with more than four (4) dwelling units per building. Cottage homes and very small lot single-family houses are also appropriate within this land use category. Higher density multi-family uses, where practical, should be located in proximity to transit facilities. Certain nonresidential uses, including, but not limited to, schools, places of worship, and parks are appropriate within these areas and should be centrally located to provide easy accessibility.

Permitted zoning districts: R-3, R-4, RM-4, RM-5, RM-6, MF-18, MF-25, MF-33, MH, MHC, and MHP.

Typical densities in this land use category would range from 13 to 33 dwelling units per acre.

IDZ, PUD, MXD, and TOD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.
Residential Land Uses

High Density Residential – includes low-rise to mid-rise buildings with four (4) or more dwelling units in each. High density residential provides for compact development including apartments, condominiums, and assisted living facilities. This form of development is typically located along or near major arterials or collectors. High density multi-family uses should be located in close proximity to transit facilities. Certain nonresidential uses, including, but not limited to schools, places of worship, and parks are appropriate within these areas and should be centrally located to provide easy accessibility. This classification may be used as a transitional buffer between lower density residential uses and nonresidential uses. High density residential uses should be located in a manner that does not route traffic through lower-density residential uses. Permitted zoning districts: RM-4, MF-25, MF-33, MF-40, MF-50, MF-65, MH, MHC, and MHP.

Typical densities in this land use category would range from 25 to 50 dwelling units per acre.

IDZ, PUD, MXD, and TOD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.
Commercial Land Uses

**Neighborhood Commercial** – includes smaller intensity commercial uses such as small-scale retail or offices, professional services, and convenience retail and services that are intended to support the adjacent residential uses. Neighborhood commercial uses should be located within walking distance of neighborhood residential areas. Special consideration should be given to pedestrian and bicycle facilities that connect neighborhoods to commercial nodes. Permitted zoning districts: O-1, NC, and C-1.

IDZ, PUD, MXD, TOD, and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.
Commercial Land Uses

Community Commercial – includes offices, professional services, and retail uses that are accessible to bicyclists and pedestrians and linked to transit facilities. This form of development should be located in proximity to major intersections or where an existing commercial area has been established. Community commercial uses are intended to support multiple neighborhoods, have a larger market draw than neighborhood commercial uses, and attract patrons from the neighboring residential areas. All off-street parking and loading areas adjacent to residential uses should include landscape buffers, lighting and signage controls. Examples of community commercial uses include, but are not limited to, cafes, offices, restaurants, beauty parlors, neighborhood groceries or markets, shoe repair shops and medical clinics. Permitted zoning districts: O-1.5, NC, C-1, and C-2.

IDZ, PUD, MXD, TOD, and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.
Commercial Land Uses

Regional Commercial – includes high intensity uses that draw customers from both adjacent communities as well as the larger metropolitan region. Regional commercial uses are typically located in general proximity to nodes along expressways or major arterial roadways and incorporate high-capacity transit facilities. Regional Commercial uses should incorporate well-defined entrances, shared internal circulation, limited curb cuts to expressways and arterial streets, sidewalks and shade trees in parking lots, landscaping between the parking lots and roadways, and well-designed monument signage. Examples of regional commercial uses include, but are not limited to, movie theaters, plant nurseries, automotive repair shops, fitness centers, home improvement centers, hotels and motels, mid- to high-rise office buildings, and automobile dealerships. Permitted zoning districts: O-1.5, O-2, C-2, C-3, L, and BP. IDZ, PUD, MXD, TOD and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.
**Mixed-Use Land Uses**

*Neighborhood Mixed-Use* – contains a mix of residential, commercial, and institutional uses at a neighborhood scale. Within mixed-use buildings, residential units located above first floor are encouraged. Typical first floor uses include, but are not limited to, small office spaces, professional services, and small scale retail establishments and restaurants. The mix of uses may be vertically or horizontally distributed, and there is no requirement that a single building contain more than one use. Live/work housing options are permissible in Neighborhood Mixed-Use area to ensure access to housing options and services within close proximity for the local workforce. Where practical, buildings are situated close to the public right-of-way, and parking is located behind buildings. Parking requirements may be minimized using a variety of creative methods, such as shared or cooperative parking agreements, to maximize land available for housing and community services. Pedestrian spaces are encouraged to include lighting and signage, and streetscaping should be scaled for pedestrians, cyclists, and vehicles. Properties classified as Neighborhood Mixed-Use should be located in close proximity to transit facilities. Permitted zoning districts: RM-4, RM-5, RM-6, MF-18, O-1, NC, C-1, MH, MHC, MHP, FBZD, AE-1, and AE-2.

IDZ, PUD, MXD, TOD and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.
Mixed-Use Land Uses

Urban Mixed-Use – contains a mix of residential, commercial, and institutional uses at a medium level of intensity. Urban Mixed Use development is typically larger-scale than Neighborhood Mixed-Use and smaller-scale than Regional Mixed-Use, although many of the allowable uses could be the same in all three categories. Building footprints may be block-scale, but could be smaller depending on block configuration and overall development density. Typical first floor uses include, but are not limited to, professional services, offices, institutional uses, restaurants, and retail including grocery stores. The mix of uses may be vertically or horizontally distributed, and there is no requirement that a single building contain more than one use. Live/work housing options are permissible in Urban Mixed-Use areas to ensure access to housing options and services within close proximity for the local workforce. Structured parking is encouraged in Urban Mixed-Use category, but is not required. Parking requirements may be satisfied through shared or cooperative parking agreements, which could include off-site garages or lots. The Urban Mixed-Use category should be located in proximity to transit facilities. Permitted zoning districts: RM-4, RM-5, RM-6, MF-18, MF-25, MF-33, MF-40, O-1, O-1.5, C-1, C-2, MH, MHP, MHC, FBZD, AE-1, AE-2, AE-3, and AE-4. IDZ, PUD, MXD, TOD and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.
Mixed-Use Land Uses

Regional Mixed-Use – contains residential, commercial and institutional uses at high densities. Regional Mixed-Use developments are typically located within regional centers and in close proximity to transit facilities, where mid-rise to high-rise buildings would be appropriate. Typical lower floor uses include, but are not limited to, offices, professional services, institutional uses, restaurants, and retail including grocery stores. The mix of uses may be vertically or horizontally distributed, and there is no requirement that a single building contain more than one use. Live/work housing options are permissible in Regional Mixed-Use areas to ensure access to housing options and services within close proximity for the local workforce. Where feasible, development is ideally built at the block scale, with minimum building setbacks. Parking requirements may be satisfied through shared or cooperative parking agreements, which can include off-site garages or lots. If parking requirements are satisfied on-site, structured parking is encouraged. Pedestrian spaces are encouraged to be generous in width and lighting, with streetscaping and signage scaled to pedestrians. Regional Mixed Use projects encourage incorporation of transit facilities into development. Permitted zoning districts: MF-33, MF-40, MF-50, MF-65, O-1.5, O-2, C-2, C-3, D, ED, FBZD, AE-1, AE-2, AE-3, and AE-4.

IDZ, PUD, MXD, TOD and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.
Mixed-Use Land Uses

Employment/Flex Mixed-Use – provides a flexible live/work environment with an urban mix of residential and light service industrial uses. Uses include smaller-scale office, retail, art studio warehouses, art-oriented fabrication, creative businesses and work spaces, and cottage industrial and fabrication uses. Adaptive uses of vacant or underutilized structures are encouraged to provide residential urban infill and appropriate employment opportunities within or in close proximity to neighborhoods. Buildings have a smaller footprint and can closely resemble campus-like development across multiple sites or with several multi-functioning buildings on one site. Permitted zoning districts: RM-4, MF-18, MF-25, MF-33, O-1, O-1.5, C-1, C-2, L, AE-1, AE-2, AE-3, and AE-4. IDZ, PUD, MXD, TOD and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.
Mixed-Use Land Uses

**Business/Innovation Mixed-Use** — accommodates industrial uses with office, commercial, and residential uses, all within a cohesive setting, on a larger scale and within larger footprints than the Employment/Flex Mixed-Use category. Industrial arts workshops, high tech fabrication, processing and assembly, and other industrial uses are permitted, in addition to commercial uses. Vocational training, technological learning centers, medical campuses, and research/development institutions are also appropriate for these spaces. Additional environmental performance standards should be employed for properties designated as Business/Innovation Mixed-Use, such as hours of activity, loading, noise levels and lighting, to ensure that the intensity of the industrially oriented uses is comparable to that of the other non-residential uses. The mix of uses may be either vertically or horizontally distributed. Live/work housing options are permissible in Business/Innovation Mixed Use areas to ensure access to housing options and services within close proximity of business innovation areas for the local-workforce. Business/Innovation mixed use should incorporate transit and bicycle facilities to serve the training and employment base. Permitted zoning districts: RM-4, MF-18, MF-25, O-1.5, O-2, C-2, C-3, L, I-1, MI-1, BP, AE-1, AE-2, AE-3, and AE-4.

IDZ, PUD, MXD, TOD and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.
Industrial Land Uses

Light Industrial – includes a mix of manufacturing uses, business park, and limited retail/service uses that serve the industrial uses. Industrial uses should be screened and buffered from adjoining non-industrial uses. Any outside storage should be under a roof and screened from public view. Examples of light industrial uses include drug laboratories, furniture wholesalers, lumberyards, food production, and warehousing. Permitted zoning districts: L, I-1, MI-1, and BP.

IDZ, TOD, and MPCD may be considered consistent with this land use category, provided the permitted uses included on the zoning site plan and zoning ordinance are consistent with the uses and densities outlined above.
Industrial Land Uses

Heavy Industrial – includes heavy manufacturing, processing and fabricating businesses. Heavy industrial uses shall be concentrated at arterials, expressways, and railroad lines. This category is not compatible with neighborhood-scaled categories or those that permit residential zoning. Heavy Industrial should be separated from non-industrial uses by an allowable land use or a significant buffer. Examples of heavy industrial uses include auto manufacturing, battery manufacturing, and petrochemical bulk storage. Permitted zoning districts: I-1, I-2, MI-1, MI-2, QD, and SGD.
Non-Residential Land Uses

Parks/Open Space – may include, but is not limited to, large, linear, or unimproved land where conservation is promoted and development is not encouraged due to the presence of topographic constraints or institutional uses on the site. Parks/Open Space may include utility corridors and public or private land uses that encourage outdoor passive or active recreation. Examples include city owned and/or operated pocket, regional, or linear parks, as well as private parks associated with subdivisions and neighborhood associations.
Non-Residential Land Uses

**Agricultural** – includes crop agriculture, ranching, and related agribusiness practices. Single-family detached houses and detached accessory dwelling units are permitted on agricultural and ranch lands at very low densities or in conservation subdivisions that will not interfere with agricultural operations. Limited commercial uses directly serving agricultural and ranching uses, such as farmers markets, nurseries, stables, bed and breakfasts are permitted. To maintain scenic qualities, natural vegetative buffers, deeper setbacks, increased signage control, earthen drainage channels, and more restrictive access management standards are desired along major scenic corridors. Floodplain protection and buffer zones along creeks and rivers are instrumental in retaining rural character. Permitted zoning districts: RP and FR.
Non-Residential Land Uses

City/State/Federal Government – includes areas owned and operated by a federal, state, or city agency. Examples may include government offices, public service facilities such as libraries and police stations, military bases, state colleges, and federal courts. This category does not apply to properties owned by a public agency but leased to and operated by another party.
Upcoming Meeting Dates

Tuesday, July 31, 2018 6:00 PM – 7:30 PM
Stinson Airport, Banquet Room
8535 Mission Road, 78214

Thursday, August 2, 2018 6:00 PM – 7:30 PM
Igo Library, Meeting Rooms
13330 Kyle Seale Pkwy, 78249
