

5 November 2015

Peter Zanoni
Deputy City Manager
City of San Antonio
P.O. Box 839966
San Antonio, TX 78283

Dear Mr. Zanoni,

Attached is the **final report** entitled *Cities of San Antonio and Fair Oaks Ranch Water Policy Analysis*, a project deliverable outlined in the contract between the Water Conservation and Technology Center (Dr. Calvin Finch, Principal Investigator) and the City of San Antonio. This final version addressed concerns we were able to address within strict time constraints and incorporates input from the beneficial engagement of an independent Science Review Panel, which, I contend, served to enhance the final report in many ways. The final report provides: (1) broad description of both water projects and water issues, (2) validation and improvements to water project “risk” assessments, (3) validation and improvements to water issue grading, and (4) further recommendations and considerations from a diverse panel of water experts.

The water report and a separate question and answer document are both available on the Institute websites: <http://irnr.tamu.edu> or <http://twri.tamu.edu>. We thank you for your patience in allowing us to complete this process.

Sincerely,

Roel Lopez
Director
