

WHAT'S IN YOUR RUNOFF?

Which of the following gets carried into our storm drains and empties into our rivers and creeks when it rains?

- | | |
|---|--|
| <input type="checkbox"/> lawn herbicides | <input type="checkbox"/> motor oil |
| <input type="checkbox"/> household cleaners | <input type="checkbox"/> lawn pesticides |
| <input type="checkbox"/> house paint | <input type="checkbox"/> transmission fluid |
| <input type="checkbox"/> polish products | <input type="checkbox"/> car wash soap |
| <input type="checkbox"/> used cooking oil | <input type="checkbox"/> pet waste
(E. coli bacteria) |

ALL OF THESE AND MORE

FALSE:

Storm water runoff is treated just like toilet and sink water when it drains into our sewers.

TRUE:

Runoff pollutants poison fish, plants, and animals that live in or drink from polluted rivers and creeks. They also make water unsafe for human swimming and fishing.

Don't dump household hazardous waste, chemicals or trash on the ground or in the street.
Help keep San Antonio's water clean.
