Station**

(Level 2 Charging)

Phone: (702) 696-1600

Welcome to the Global Charging Network of EV-ChargeAmerica.com

With the RFID Tags attached to the EVCA charging stations, you can access the world's easiest to use and most sophisticated electric vehicle charging infrastructure. Congratulations on being a leader in electric vehicle transportation.

The attached RFID Tag is assigned to your location to access Free charging sessions and is immediately usable at any of the EVCA Charging Stations.

If you encounter any problems during use, contact Customer Service by calling the number on the charging stations.

To Start Level 2 Charging:

1. Locate an unoccupied Charging Station. The display should read, "Ready". You'll only need a RFID Tag to start a charging session.

Note: Level 2 cars (Volts, Leafs, etc. use the RFID Tag and connector on the right side of the charging station; Level 1 cars (household current), use the tag and outlet on the left side of the charging station.

2. For Level 2 Charging, swipe the RFID Tag attached to the right side of the EVSE across the

RFID reader near the left side of the black Lexan™ panel. The unit will authorize the Tag and then walk you through the rest of the cycle.

ADDITIONAL RFID KEY TAGS ARE AVAILABLE FROM EV-CHARGE AMERICA

FOR TAGS OR ASSISTANCE CALL:
(702) 696-1600

Write down the reference number on your RFID Tag and put it in a safe place. In case of loss or failure please provide customer service with this number.

3. After swiping the tag, when the display reads: "Plug in Your Vehicle" it is then safe to plug the Level 2 cord into your vehicle. Push your connector all the way in to the outlet to ensure a secure connection.

4. The Display will read out "Awaiting Connection" until the vehicle is fully connected to the EVSE.

5. When the EVSE and the Vehicle have correctly exchanged data, the display will read: "Vehicle Charging" during the entire charging session.

To Stop Level 2 Charging:

1. Again, swipe the same RFID Tag across the Tag reader. The display will show "Unplug your Vehicle".

Important: You must use the same RFID Tag to start and end your charging session.

2. It is now safe to remove the charging cord from your Vehicle and return it to the charging station socket. **Note:** Do not unplug the connector without first deactivating the EVSE with the RFID Tag, as the connector on the Vehicle could be damaged from arcing.

3. Your charging session is now complete.
