The Roosevelt Avenue Community Transportation Input Survey No. 1 was developed to help the residents in the community and the general public express their vision for the Roosevelt Avenue corridor. The survey provided respondents with key questions regarding pedestrian amenities and corridor improvements. Respondents were able to rank corridor features and elaborate on preference and share concerns along the corridor.

The survey was launched on March 8, 2019 and closed on April 15, 2019. The City of San Antonio and CEC Consultants, the project consultant, utilized a variety of outreach methods to circulate the survey via social media, as well as hard copies at neighborhood associations, Mission Branch Library, City Council District 3 Office, and the District 5 Senior Multi-Service Health & Resource Center. Approximately 251 surveys were completed.
