

**CITY OF SAN ANTONIO
OFFICE OF MANAGEMENT & BUDGET**

TO: Sheryl Sculley, City Manager

FROM: Maria Villagómez, Director, Office of Management & Budget 

COPY: Mayor and City Council; Executive Leadership Team; William McManus, Police Chief; Charles Hood, Fire Chief; Kathy Davis, Animal Care Services Director, Rod Sanchez, Development Services Director; Robbie Greenblum, Chief of Staff to the Mayor; Chris Callanen, Assistant to the City Council

DATE: August 23, 2013

SUBJECT: REQUESTED BUDGET INFORMATION FROM CITY COUNCIL BUDGET WORKSESSIONS

This memo addresses requests for information from City Councilmembers during the Worksessions held on Tuesday, August 13 and on Wednesday, August 14.

Fire

Fire and EMS Response Times

Councilman Soules and Councilwoman Chan requested information regarding Fire and EMS response times by fire station. Councilwoman Chan also requested the median response time for Fire and EMS calls.

Response times are reported from when the call is received to when the first unit arrives on scene or is staged. In FY 2012, the actual average response time was 7:43. In FY 2013, the Fire Department's performance target for average response time was 7:42, with a year-end projection response time of 7:38. Through July 2013, the actual average response time is 7:46, and the median response time is 7:17. The Fire Department projects that the average response time will be 7:38 by September 30, 2013.

Average response times by fire station for FY 2012 and actuals from October to July 2013 are provided in Attachment I.

Peak EMS Units

Councilwoman Chan requested an analysis of overtime cost per peak unit and cost comparisons for staffing more full-time fire personnel versus utilizing overtime.

The Fire Department currently operates up to eight EMS units designated as peak units. Hours and days of operation vary depending on expected peak call volume and time. A peak is determined by the concentration of high call density and extended response times.

Requested Budget Information from City Council Budget Worksessions

August 23, 2013

Page 2 of 4

Each peak unit has an average deployment time of 2,800 hours annually, or about 32% of a full-time unit. On average, Peak units respond to 36% more calls per hour than normal full-time units on duty for 24-hours per day. Peak units operate solely on overtime and the city has \$2.2 million budgeted for this purpose in FY 14. The peak program is the equivalent to 2.48 full time units annually. If the department was to operate 2.48 units utilizing full-time personnel the cost would be approximately \$3.77 million. Below is a cost comparison on the per-hour cost for a peak unit versus a full-time unit.

EMS Unit Cost Comparison

Unit Type	Annual Hours	Cost Per Hour	Total Annual Expense
Full-Time (2.48) Units	22,400	\$168.30	\$3.77 Million
Peak (2.48) Units	22,400	\$98.21	\$2.20 Million

Although peak units are more cost effective per hour than the addition of a full-time unit, a further increase in overtime peak unit hours would likely have an adverse effect on the overall pool of paramedics available to work. This is due to the availability of paramedic staffing, particularly on weekends and holidays. Therefore, the department does not recommend additional peak hours.

Locations with Hazardous Materials on-site

Councilwoman Viagran requested a listing of locations that have hazardous materials on-site. The list of these locations by city council district is provided in Attachment II.

Police

Officers per 1,000

Mayor Castro requested a history of the number of Police Officers per 1,000 population. The table below provides this analysis for FY 2008 to FY 2014. To maintain a consistent comparison with other cities regarding the number of officers per 1,000 population, the table below shows the number of officers from all enforcement areas to include SAPD Officers, Parks Police, Airport Police, and officers assigned to school districts:

Officers Per 1,000 Population

All Enforcement Areas

Fiscal Year	2008	2009	2010	2011	2012	2013	2014
Number of Officers per 1,000	2.03	2.09	2.13	2.14	2.12	2.11	2.08
Population (<i>in Millions</i>)	1.29	1.31	1.33	1.35	1.37	1.39	1.41
Total Number of Officers	2,613	2,736	2,830	2,884	2,892	2,921	2,921

Accreditation Program

Councilwoman Taylor requested additional detail on regarding the proposed elimination of the accreditation program in the Police Department.

The Department was accredited by the Commission on Accreditation for Law Enforcement Agencies (CALEA) in July 2011. The accreditation process helps monitor that the Department’s policies and procedures are within established national best practices. In place of this formal accreditation, the Department will continue to maintain the highest standards and keep pace with revised standards through the combined efforts of the existing Quality Assurance and Bureau Liaison Units of the Department. These units will continue to assure that the Department maintains best practices through formalized inspections, performance measures, standardized documentation of processes and an established review of process. The proposed elimination of SAPD’s Accreditation Unit and subsequent lapse of accreditation from CALEA will not have an impact on the delivery of core services to the community.

Wrong-Way Drivers

Councilman Medina requested for a map reflecting wrong way driving incidents and the current prevention measures taken by SAPD.

Maps of wrong way driver calls are provided in Attachment III. The maps display incidents recorded before and after the installation of preventive measures (radars and flashing lights) at entrance and exit ramps along US 281. These preventive measures were funded and installed by TxDOT based on the high rate of wrong way driving incidents along this corridor. The table below summarizes the average number of incidents per month.

Time Period	Average Number of Incidents per Month
Before preventative measures	3.3
After preventative measures installed	2.3
% Decrease in incidents per month	-29%

Code Enforcement

Graffiti Abatement Process

Councilwoman Viagran requested information on the process for graffiti abatement on owner-occupied private property, tenant-occupied property, and the number of abatements for each.

The City’s ordinance exempts owner-occupied properties from abatement; however, Code Enforcement does offer abatement services to these properties. If graffiti is located on an owner-occupied property, an attempt is made to contact the property owner, in person, at the location. If no contact is made, a Right of Entry (ROE) is left for their action. Once a property owner has signed the ROE, graffiti removal can be scheduled with the graffiti office.

Requested Budget Information from City Council Budget Worksessions

August 23, 2013

Page 4 of 4

Tenant-occupied properties and vacant structures are included in the City’s ordinance. For “hardship” cases (elderly, disabled, etc.), Code Enforcement will offer to abate the graffiti. If graffiti is located on tenant-occupied private property, an attempt is made to contact the property owner/agent. If no contact is made, a Right of Entry (ROE) is left for their action at the address that has graffiti. Once a property owner/agent has signed the ROE, graffiti removal can be scheduled with the graffiti office. If it is determined that the graffiti is a violation and in ordinary public view, and no contact has been made with the graffiti office to sign the ROE by the owner/agent, the property owner is issued a *Notice of Violation*. The owner then has 15 days to remove the graffiti. If the graffiti is not abated in that time frame, the City can then hire a contractor to abate the graffiti and bill the property owner.

The table below provides the actual number of abatements from October 1, 2012 through August 14, 2013. The data for the proactive corridor abatements are not currently tracked as either owner- or tenant-occupied; however, most of the properties are tenant-occupied.

Property Type	Number of Abatements
Owner-Occupied Properties	141
Tenant-Occupied Properties	183
Proactive Corridor Properties	9,015

Animal Care Services

Temporary Veterinarian Services

Councilwoman Viagran requested information on the number of temporary positions in the Animal Care Services Department. The Animal Care Services Department has a total 10 temporary veterinarian technician positions.

Spay and Neuter Surgeries

Councilwoman Taylor requested information on the amount of free spay and neutering funding set aside to address the pit bull population. Of the total FY 2014 spay and neuter budget of \$500,000, approximately \$50,000 is allocated for pit bill spay and neutering services.
