% of Total

Community 2016 On-Road Transportation
GHG Emissions - by Fuel Source

6,055 ktCO₂e total¹

■ Gasoline ■ Diesel ■ Ethanol ■ Electric ■ CNG, Propane, LNG

- Passenger cars contribute the greatest share of transportation GHG emissions, followed by light trucks.
- Gasoline is the primary emission source for the on-road transportation and transit sectors in San Antonio.
- River barges, not included in these charts, emitted approximately **45 ktCO₂e** in 2016.

¹ All values are given in thousands of metric tons CO₂ equivalent (ktCO₂e).
